SUPPLEMENTARY INFORMATION:

Title: Plants for Planting Regulations.

OMB Control Number: 0579-0190.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: As authorized by the Plant Protection Act (PPA, 7 U.S.C. 7701 et seq.), the Secretary of Agriculture, either independently or in cooperation with States, may carry out operations or measures to detect, eradicate, suppress, control, prevent, or retard the spread of plant pests that are new to or not widely distributed within the United States. This authority has been delegated to the Animal and Plant Health Inspection Service (APHIS) of the U.S.

Department of Agriculture (USDA).

APHIS regulations contained in “Subpart–Plants for Planting” (7 CFR 319.37 through 319.37-14) prohibit or restrict, among other things, the importation of living plants, plant parts, and seeds for propagation. In accordance with these regulations, plants for planting from certain parts of the world may be imported into the United States only under certain conditions to prevent the introduction of plant pests into the United States. Individuals who are involved in

growing, exporting, and importing plants for planting must provide information to APHIS about the commodities they wish to bring into the United States. This information serves as the supporting documentation needed to issue required forms and documents, and is vital to help ensure that plant pests are not introduced into the United States.

This notice includes the information collection requirements currently approved by the Office of Management and Budget (OMB) for the importation of plants for planting under OMB control number 0579-0279, and update of nursery stock regulations under OMB control number 0579-0190. After OMB approves and combines the burden for both collections under one collection (0579-0190), the USDA will retire OMB control number 0579-0279.

In addition, on May 27, 2011, APHIS published a final rule in the Federal Register (76 FR 31172-31210, Docket No. APHIS-2006-0011)¹ that changed the nursery stock regulations (7 CFR 319.37 through 319.37-14) to refer instead to “plants for planting.” In addition, since the final rule has been published, “update” is no longer needed. As a result, we have revised the title of this information collection to “Plants for Planting Regulations.”

We are asking OMB to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

¹ <http://www.regulations.gov/#!docketDetail;D=APHIS-2006-0011>

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.1204 hours per response.

Respondents: Importers and exporters of plants for planting.

Estimated annual number of respondents: 94.

Estimated annual number of responses per respondent: 57.

Estimated annual number of responses: 5,364.

Estimated total annual burden on respondents: 646 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 18th day of February 2014.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.
